THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF TITLES 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION.

SOURCE

25X1X

In February 1954, Soviet Army units in East Germany did not undergo local changes, nor did they receive reinforcements. The assignment of 85-mm AT guns continued and officers' dependents kept arriving. Training was concentrated on winter combat firing by all heavy arms. Individual, large-scale exercises were conducted not before late February, contrary to last year's practice.

GERMANY.

Order of Battle.

25X1X

1. Reports received during the period from 1 February to 1 March 1954 confirm the following units with their permanent post:

a. GHC Units of the Group of Occupation Forces Germany (GOFG).

2d Gds AAA Div	-	RUHRGEBIET-WUENSSEN	February
6th Gds AAA Div (US)	-	CHEMNITZ-AUE area	February
32d AAA Div (US)	-	FRANKFURT/Oder-KUESSTEN	February

b. Eighth Guards Army.

An unidentified AAA Regt of the 13th AAA Div	-	LEIPZIG-SCHOENAU	February
497th AAA Regt (US)	-	RUDOLFSSTADT	February
67th Gds Mecz Regt	-	ZEITZ	February
24th Gds RL Bn (US)	-	ZEITZ	25 January

c. Third Shock Army.

3d Gds AAA Div	-	MAGDEBURG	February
953d AAA Bn (US)	-	TANGERSHUEDE	February
153d Gds Hv Tank SF Regt		HILLERSLEBEN	9 February
An unidentified Gds Engr Bn of the 19th Gds Mecz Div		HILLERSLEBEN	end of December 1953
An unidentified AAA Regt of the IX Mtz Rifle Corps		SCHWERIN	6 February
An unidentified Engr Bn of the IX Mtz Rifle Corps		SCHWERIN-GOERRIES	11 February
Hq of the 94th Gds Mtz Rifle Div		SCHWERIN	10 February
115th How Arty Regt		HAGENOW	4 February
348th Engr Bn		LUDWIGSLUST(?)	10 February

d. First Guards Mechanized Army.

An unidentified Tank Ing Bn of the 9th Tank Div		RIESA or ZETHMAIN	23 November 1953
44th Gds Tank Regt	-	KOENIGSBRUECK	January

e. Second Guards Mechanized Army.

Hq of the 12th Gds Tank Div		NEURUPPIN	15 January
48th Gds Tank Regt		NEURUPPIN	12 February
49th Gds Tank Regt		NEURUPPIN	12 February
66th Gds Tank Regt		NEURUPPIN	12 February
34th Gds Mtz Rifle Regt		DROEGEN	12 February
226th Mort Regt		NEURUPPIN	12 February
75th AAA Regt (US)		NEURUPPIN	12 February
205th Engr Bn		GENTZRODE	11 February

175th Tank Regt	[REDACTED]	PRENZLAU	23 December 1953
Hq of the 10th Gds Tank Div	[REDACTED]	KRAMPHITZ	30 January

Training.

2. Advanced combat firing practice was conducted by small, mixed units at company and battalion level on garrison training grounds and in adjacent open terrain, with the units frequently bivouacking in the vicinity of the barracks installations for two or three days. Large practice marches which, in 1953, were in some instances conducted at reinforced division level under participation of units of the IV Arty Corps and army artillery units from early February up to March have not been held up to mid-February this year. [REDACTED]

25X1X

25X1X

PLAUE-ALTENBURG area: movements and troop bivouacs of the 39th Gds Mtz Rifle Div and of army artillery units on 9 February.

WIKSGENFELS area: exercise of the 57th Gds Mtz Rifle Div at reinforced regimental level on 15 February.

GERA-BAD BERKA area: transfer of AT artillery units from GERA to BAD BERKA on 17 February.

Area of SCHWERIN and WISMAR: exercise between SCHWERIN and WISMAR of the 94th Gds Mtz Rifle Div and headquarters units of the IX Mtz Rifle Corps on 13 February.

Area of MERIGAU, east of TOPGAN: exercise, presumably command-post exercise of the First Gds Mecz Army (?) on 17 February.

Area north of REERS-
WALDE: presumably, command-post exercise of the Fourth Gds Mecz Army from 16 to 18 February.

25X1A

25X1A

Area north of presumably, command-post exercise of the Second Gds
PUMERSHENG; Recz Army on 10 February.

Detailed information on strength, identity of units and course of exercise could not be obtained as the troops were camouflaged in the woods, heavy guns were immediately dug in and all motor vehicles had cover numbers. The latter had tactical insignia as they had had in the fall of 1953. Main subject of training in February was short-term winter combat firing which, with each exercise lasting only a few days, necessitated numerous shipments and, thus, led to a temporary shortage of railroad cars in the area of the BERNIN railroad district. About 50 shipments alone went through the SCHWENIN railroad district for AA firing practice at MUSTROW during a period of two weeks. Disregarding possible damage, firing practice was increasingly held in open terrain in addition to practice on troop training grounds. In this connection, FORST ZEITZ, RIE LOWITZ, which is located northeast of LUDWIGSLUST, and FORST NEUGLONICK, southeast of WITSTOCK troop training grounds, must be mentioned as new, or enlarged, target ranges.

AAA.

It is of interest that regular firing of medium AAA units of the army and air force in MUSTROW had started already in late January and lasted eight to ten days only.* Last year, the firing began not before mid-February and lasted three weeks for each unit, possibly because the AAA units participated in large-scale exercises and could not leave earlier. A summary on winter firing practice in the various army areas is attached as Annex 1.

Engineer Troops.

No special engineer exercises were observed in February. The APOLLONSTORF training area apparently again quartered engineer units of the Third Gds Recz Army.* On 20 February, a unit of the unidentified engineer regiment of the GDFG including 200 men with 21 trucks, 3 prime movers and aggregates moved from PUMERSHENG to KUTERSDORF. The reason for this transfer has not become known.

Miscellaneous.

3. Soviet officer dependents kept arriving at the previous rate in all army areas in February. Information in the last report that officers' dependents were no longer allowed to come to East Germany did not come true. The Soviet dependents were quartered in barracks installations and confiscated German residences. New dwellings and schools for children were under construction. While the Big-Four Conference was still underway, these measures were taken by the population as indications that the Soviet Occupation Forces would not leave East Germany.

Transportation.

4. During the reported period, the traffic situation of the East German Railroads was satisfactory. There were temporary difficulties caused by a new cold wave during the first half of the month. At some points there was a shortage of boxcars and flatcars caused by increased Soviet requirements in connection with winter firing practices at firing ranges.

25X1A

25X1A

5. The coal situation continued to be critical. Coal imports from Poland remained behind schedule and necessitated the utilization of brown coal briquettes originally earmarked for civilian consumption. Coal stocks available on 7 February 1954 represented only 6.2 days' requirements, i.e. about 25 percent of normal coal stocks.
6. Due to seasonal reasons, rail traffic over the Oder-Neisse line and to and from Czechoslovakia was at a lower level than observed in previous months. It could not yet be definitely determined whether reparations deliveries to the USSR were actually stopped on 1 January 1954. Some observations made would support the assumption that this is the case. (See also paragraphs 6b and 8 of this report). In detail, the following features of rail border traffic appear noteworthy:
 - a. Hard coal imports from Poland continued at a low level and prevented the establishment of vital coal reserves.
 - b. Eastbound commercial traffic via FRANKFURT/Oder and KUESTERN dropped considerably (discontinuation of reparations deliveries?). On the other hand raw material deliveries from the USSR to East Germany continued at a high level. Grain imports from the USSR increased to a rate of 2,315 loaded cars arriving in January.
 - c. In the field of military supply traffic the shipments of motor vehicles and ammunition were particularly noteworthy. For details, see paragraph 9.
 - d. Due to seasonal reasons, the volume of uranium ore shipments to the USSR was below normal.
7. Railroad Construction Projects:

Little progress was made in the execution of current railroad construction projects. Work on the double-tracking of the COTTBUS-GUBER, LUCKENWALDE-JUBERTROG and BIELEFELD-ROELLINGEN railroad line sections may be started in the coming spring because the rail material required has been made available by the Soviets. Originally these railroad construction projects were scheduled to be executed in 1953. The reconstruction of the railroad bridge over the Neisse River at MUSKAU and of the railroad viaduct near COHLITZ will probably be completed this spring. Two new railroad lines to the east will be available after the completion of these bridges.

Miscellaneous.

8. Of the locomotive columns handling Soviet transit traffic through Poland, 25 to 30 percent were deactivated in January 1954. This measure may indicate an expected decrease of Soviet traffic (discontinuation of reparations deliveries?). In this connection it is to be noted that the forwarding agencies for reparations deliveries and DEWUTRA (German-Russian Transportation Agency) were deactivated on 1 January 1954. DEWUTRA was replaced by VEB Deutrans.

Supply.

9. Information received in January and February 1954 on Soviet supply traffic passing through East German border stations was rather scanty. In spite of incomplete coverage of this traffic

25X1A

25X1A

a. The movement from the USSR to Germany of armored personnel carriers and armored scout cars which started in May 1953 did not continue in February 1954. It is believed that the operation was concluded in early January. A total of 800 vehicles was consigned to the KVP.

25X1X b. The increased gun shipments [redacted] in December and January decreased considerably in February. It is believed that this operation which involved the shipment of 500 to 600 new artillery pieces from the USSR to Germany and which started in October 1953 has been completed. Some of the equipment was consigned to the KVP.

c. Increased ammunition shipments were [redacted] to be directed to ALTENGRANOW. These shipments may be explained by winter firing practices held at the ALTENGRANOW troop training grounds.

25X1X

d. Information was obtained to the effect that, in December 1953, the KVP received new Soviet motor vehicles dispatched from the USSR. The pertinent shipments were concealed as commercial shipments consigned to DERUTRA. The shipping of such motor vehicles probably continued in January 1954.

e. Shipments to major ration supply depots increased in volume in January and February, probably with a view to replenish stocks and to enable Soviet agencies to help alleviate the food crisis in East Germany.

f. The volume of motor vehicle shipments from the USSR to East Germany continued at a low level. These motor vehicle shipments were just adequate to replace worn-out equipment. For the first time after a prolonged period artillery prime movers were [redacted] to arrive in Germany in February.

25X1X

10. Inner-zonal military supply traffic was normal.

11. The ordnance depot in EBERSWALDE-FINOW moved to EISENTHAL, and the ration supply depot in EBERSWALDE to FINKFURT. The present whereabouts of the motor vehicle repair shop [redacted] previously located in EBERSWALDE-FINOW is not yet known; the installation possibly moved to FUERSTENWALDE. The "Walderlust" ammunition depot in EBERSWALDE was allegedly turned over to the KVP. However, this information requires confirmation.

25X1B

Kasernierte Volkspolizei.

Order of Battle.

12. No changes have been discerned in the quartering of KVP units. Several KVP posts in the southern sector of East Germany were confirmed. The cantonments of HUTWEIDE and NIEDERSCHLAG in the BAERENSTEIN area are believed to have been occupied by KVP, probably by elements of the mechanized regiment in MARIENBERG. The tank SP regiment of Division SEPTUR is located in GOETHA rather than GERA, as was temporarily believed. A complete list on KVP quarters is attached as Annex 2.

Training.

13. Since the beginning of the new training year in December 1953, military drill, arms and combat practice have been conducted considerably more thoroughly than before. Most of the KVP units already engaged in alert and march practices, small combat exercises and firing with live ammunition. It

SECRET/CONTROL - U.S.OFFICIALS ONLY

SECRET/CONTROL - U.S. OFFICIALS ONLY

- 7 -

25X1A

25X1A

It became more evident than last year that course and standard of training are being adapted to that of Soviet troops in East Germany, with special emphasis on early training in the terrain. According to several deserters, this kind of training has already had favorable effects on mood and discipline of the troops.

Armament and Equipment.

14. a. The divisions ERFURT and HALLE are still considerably short of tanks, SP guns and artillery weapons. Part of the armored vehicles available are old and obsolete. Deserters stated that weapons needed would be delivered in January 1954. [REDACTED]
- From December 1953 up to February 1954, numerous tanks of Divisions PRENZLAU and EGGESIN were repaired and completely overhauled at the NEUBRANDENBURG tank repair shop. All armored vehicles were scheduled to be ready for operation at the beginning of the summer training.
- b. In December 1953 and January 1954, the KVP received several hundreds of ZIS-150 and ZIS-151 trucks and sedans from the USSR. The vehicles arrived in OPANIENBURG, BERLIN-MAGTEVIEHHOF and LEIPZIG via FRANKFURT/Oder and were distributed to the troops from there. Several sources reported that more than 300 Soviet trucks arrived, for instance, in the DROEGENHEIDE-EGGESIN area during the period under review.
- c. The first delivery of steel helmets to KVP Division EGGESIN was [REDACTED] in mid-January. The helmets were stored at the division clothing depot in GUMWITZ and have apparently not yet been issued. New uniforms arrived in GUMWITZ at the same time. A decree on service colors announced to the troops in December 1953 read that special units of infantry regiments such as the engineer company, signal communication company and self-propelled company will wear the ruby-colored epaulets of the infantry and special units of the tank and mechanized regiments the blue service color of tank and mechanized troops.

25X1X

25X1X

Building Projects.

15. a. Construction work in the STRAUSBERG area was continued. Several sources reported that the KVP Department of the Ministry of the Interior will move into the new quarters in STRAUSBERG in September 1954.
- b. Large garages were scheduled for construction in 1954 in most of the KVP posts. It was also planned to construct settlements and buildings for recreational purposes in the area of DROEGENHEIDE, TORGELOW, EGGESIN and KARPIN.

AUSTRIA and HUNGARY.

Order of Battle.

16. The following units were confirmed during the period under review by Soviet documents:

Training.

17. Basic training and infantry combat training was also continued with units other than infantry in late January and early February. Stress was laid on special training such as laying of cables and telephone communication, bridge building, and cross-country driving with armored vehicles. Artillery firing was held at DOELLERSHEIM troop training grounds in early February.

Annex 1 to [REDACTED]

Soviet Troops at Winter Firing Practice at Troop Training Grounds and
in Open Terrain

1. ALTENGRABOW

IV Arty Corps

24th Arty Div (US) Units which, between 1 and 22 February, went to, or came from, three-day firing practice at ALTENGRABOW in four groups of 3 to 4 shipments each included:

first group: on 1 February, 4 shipments from POTSDAM to ALTENGRABOW and, on 5 February, 4 shipments back to POTSDAM

second group: on 10 February, 3 shipments from POTSDAM to ALTENGRABOW and, on 14 February, 3 shipments back to POTSDAM

third group: on 13 February, 3 shipments from POTSDAM to ALTENGRABOW and, on 16 February, 4 shipments back to POTSDAM

fourth group: on 19 February, 2 shipments from POTSDAM to ALTENGRABOW. The return movement has not yet been covered

6th Arty Div and
25th Gds RL Brig

Heavy elements departed from RATHENOW and BRANDENBURG on 17 February, presumably to conduct firing practice at ALTENGRABOW, as they did in January. *

23d AAA Div (US)

AAA units, presumably light units, moved to ALTENGRABOW for firing practice. They included:

on 8 February, 2 shipments from FRANKFURT/ODER

on 16 February, 3 shipments from FRANKFURT/ODER

and 2 shipments from KUESTRIN

The following is supplementary information on artillery and rocket launcher units transferring for firing practice to ALTENGRABOW:

9th Gds Tank Div:

on 17 January, 3 shipments from NEUSTRELITZ to ALTENGRABOW;

on 23 January, 2 shipments back to NEUSTRELITZ;

on 19 January, 1 shipment from FUERSTENBERG to ALTENGRABOW;

on 21 January, 1 shipment back to FUERSTENBERG;

on 23 January, 1 shipment from FUERSTENBERG to ALTENGRABOW

12th Gds Tank Div:

on 18 January, 1 shipment from NEURUPPIN to ALTENGRABOW;

on 22 January, 1 shipment back to NEURUPPIN

2. Area of the Eighth Gds Army

Intensive movements indicative of firing activity at the Thuringian troop training grounds were reported from the area of the HALLE and ERFURT railroad district headquarters in the first half of February. In detail, [REDACTED] 2 shipments departed from MENSEBURG on 7 February; that elements of the 20th Gds Mecc Div were unloaded in WEIMAR on 19 February; that heavy AT artillery units

25X1X

SECRET/CONTROL - U.S. OFFICIALS ONLY

SECRET/CONTROL - U.S. OFFICIALS ONLY

25X1A

Annex 1 to

arrived at the hitherto unoccupied KINDEL troop training grounds on 12 February; that these units started firing on 16 February; and that heavy AT artillery units practiced firing at OHRDRUF on 15 February. Units that practiced firing in FORST ZEITZ in January and February included: tanks and rocket launchers of the 20th Gds Mecz Div including the 65th Gds Mecz Regt, the 27th (?) Gds Tank Regt (US) and the 24th Gds RL Bn (US); the 308th Arty Brig (US) from GERA; tank unit of the 220th Hv Tank SP Regt from GLAUCHAU from 17 to 20 January; and, on 3 February, an SP gun battalion of the 1st Gds Tank Regt of the 8th Gds Mecz Div of the First Gds Mecz Army from BORNA.

3. Area of the Third Shock Army

LETZLING HEATH *

Units engaged in short-term firing practice included: units of the 19th Gds Mecz Div from MAGDEBURG in the northeastern sector from 27 to 29 January; units of the 207th Mtz Rifle Div from STENDAL in the northern sector in late January and on 11 February; tank and AT artillery units of the 7th Gds Tank Div of the Third Gds Mecz Army which moved to the southern sector from 9 to 15 February. They included 1 shipment from DESSAU to HALDENSLEBEN on 9 February; loadings in DESSAU, ROSSLAU and MEINSDORF on 13 February; and 1 shipment from ZEREST to HALDENSLEBEN and 2 shipments from MEINSDORF to HILLERSLEBEN on 15 February.

Die LEWITZ Northeast of LUDWIGSLUST

From 20 January to 10 February, continuous artillery and rocket launcher firing of the 4th Gds Arty Brig (US) and 10th Gds RL Regt of the IX Mtz Rifle Corps.

WITTSTOCK Area.

Between 23 January and 4 February, units of the 18th Mecz Div from PERLEBERG went to, and returned from, the training area in one shipment each. In early February, tank units of the 94th Gds Mtz Rifle Div practiced in the WITTSTOCK area. They returned to SCHWERIN on 10 and 11 February.

4. Area of the First Gds Mecz Army.

KOENIGSERUECK *

Units which practiced at KOENIGSERUECK after mid-January included units of the 8th Gds Mecz Div from all posts, except those from BORNA which practiced firing in FORST ZEITZ. Observed were shipments from KOENIGSERUECK to WURZEN and from LEIPZIG to SCHWEPNITZ on 14 January; from SCHWEPNITZ to WURZEN on 19 January; from SCHWEPNITZ to GRIMMA on 21 January; from ELLENBURG to KOENIGSERUECK on 9 February; and from LEISNIG to KOENIGSERUECK on 10 February. Artillery and rocket launcher units of the 9th Tank Div moved to KOENIGSERUECK by road on 27 January and returned by road on 30 January. Units of the 11th Gds Tank Div in DRESDEN practiced firing at KOENIGSERUECK by rotation in January and February. Light AAA units of the 6th Gds AAA Div (US) were en route from CHEMNITZ to KOENIGSERUECK on 9 February.

25X1A

Annex to

- 3 -

ZEITHAIN

Units of the 9th Tank Div, especially tank and mortar elements, continuously practiced in ZEITHAIN.

5. Area of the Second Gds Mecz Army.NEUGLIENICKE Southeast of WITTSTOCK

Tank units of the 12th Gds Tank Div from NEURUPPIN practiced firing at the new ranges in Forst NEUGLIENICKE in January and daily from 8 to 12 February.

6. Area of the Third Gds Mecz Army.JUETERBOG *

Units of all branches of service daily practiced firing on the ranges in the area of FORST ZINNA in January and February, with units of the 14th Gds Mecz Div, 6th Gds Tank Div and army troops having predominantly been identified in February. Shipments which indicated that units from other army areas also practiced firing there included shipments of light air force AAA units from FALKENBERG to WERDER on 25 January and from FINOW to JUETERBOG-ALTES LAGER on 3 February; 2 shipments of light AAA units of the 32d AAA Div (US) from FRANKFURT to JUETERBOG on 8 February; other shipments, presumably light AAA units, of the 25th Tank Div from TEMPLIN to JUETERBOG on 9 February; of the 1st Mecz Div from JUETERBOG to DOEBERITZ on 11 February; of the 12th Gds Tank Div from FORST ZINNA to NEURUPPIN on 21 February; and unidentified shipments from HALDENSLEBEN to JUETERBOG on 15 February and from JUETERBOG to BIEDERITZ on 21 February.

7. Area of the Fourth Gds Mecz ArmyTEMPLIN

Tank units of the 25th Tank Div from FRENZLAU were at TEMPLIN in late January and early February.

LIEBEROSE

The troop training grounds was vacant in early February, except for FORST TAUER where individual units of the 9th Mecz Div practiced firing.

8. WUSTROW Area *

See paragraph 2 of this report on Training.

The 45 troop shipments identified during the period under review are definitely linked with the AA firing practice at WUSTROW. Dispatching and receiving stations of AAA shipments confirm numerous posts of AAA units. See Annex 1. The following shipments, listed in organizational order,
